Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 16-21 are allowed over the prior art of record because the prior art of record including closest US Patents Kuroda et al (6144625), Tatishi et al (6282160) and Yanagisawa (5850081) considered individually or in combination fail to disclose or fairly teach an optical pickup including the combination of a light detector with four areas wherein a prepit signal is detected using a difference of the sum of pairs of areas aligned in a direction orthogonal to the track tangential direction; and a user information detecting using all four areas of the detector.

Yanagisawa (5850081) and Tateishi (682160) fail to teach the claimed invention for the reasons submitted in applicant's arguments filed on 12/19/2005.

Kuroda et al (6144625) discloses an optical pickup that detects a prepit and information signal using a quad photodetector (fig. 2). Kuroda fails to disclose detecting a prepit signal using a sum of differences of pairs of areas aligned in the direction orthogonal to the track tangential direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
